Develop a more comprehensive understanding of nature-based tourism in Malta to identify the nature-based experiences chosen by tourists

Expected outcome

An interactive map with places and experiences for nature-based tourism.

Anticipated benefits

Advancing real-time data, including citizen science initiatives, promote sustainable tourism, and boost local economies, aligning with EU restoration goals. Innovatively increases visibility for lesser-known sites while supporting conservation efforts.

Stakeholders

- Public sector
- Research and education
- NGOs and civil society
- Private sector and industry

Business application to support strategic decision-making

- Assess risks and opportunities
- Evaluate ecosystem condition and sustainability of nature-based tourism
- Compare options
- Communicate and report
- Assess impacts on stakeholders
